COURSE DESCRIPTION

It is extremely important for organizations to provide superior value to customers around the globe to achieve high level of performance. To sustain competitive advantage a company must deliver superior customer value compared to its competitors. Successful companies understand markets, buyers and competitors and decide how to deliver superior customer value by matching its distinctive capabilities to the value requirements of the market. Customer centric companies offer superior value to their customers, leverage distinctive capabilities, respond rapidly to changes in the market place, they develop right organizational climate fostering innovation to sustain competitive advantage. To build strong customer relationships and maximize sales, firms need to put every possible marketing tool to work for them. Marketing Management II entails planning and executing the conception, pricing, promotion, and distribution of ideas, goods, and services. Marketing is the art and science of creating customer value and market place exchanges that benefit the organization and its stakeholders.

COURSE OBJECTIVE

This course is concerned with the development, evaluation, and implementation of marketing management in complex environments. The objective of the course is to Design the Value, Communicate the Value and Delivering Value and manage Growth in the markets to sustain competitive advantage.
